

Press Release

HOCHTIEF wins EUR 900 million rail contract in Sweden

Partnership agreement for a 26-kilometer section of the East Link project near Stockholm

HOCHTIEF has been awarded a contract to design and expand a 26-kilometer section of the East Link railway line near Stockholm. The project, with an estimated volume of up to around EUR 900 million (9.5 billion SEK), is being developed in collaboration with the client Trafikverket (Swedish transport administrator) as part of a partnership agreement. The subsequent construction phase is scheduled to run until 2034.

Juan Santamaría, CEO of HOCHTIEF: "Our end-to-end capabilities as a leading infrastructure and services provider enable us to deliver high-quality rail assets. With the expansion of this rail link in Sweden, we are making a significant contribution to the growth of efficient and sustainable transport infrastructure in Northern Europe."

The OL31 Vagnhärad project, located southwest of Stockholm, is part of the planned 160-kilometer East Link rail connection between Järna and Linköping.

The project involves the design and construction of several tunnels and large bridges as well as a train station.

HOCHTIEF is currently planning, building, and expanding several high-speed rail lines, including a large section of the California High-Speed Rail in the USA and the Logan and Gold Coast Faster Rail project in Australia. As part of the general renovation of the German rail infrastructure network, HOCHTIEF won a major contract from Deutsche Bahn last July to expand a 42-kilometer section of double-track line on the right bank of the Rhine between Wiesbaden and Lorchhausen.

HOCHTIEF is an engineering-led global infrastructure solutions provider with leading positions in North America, Australia and Europe and a strong presence in the rapidly expanding strategic growth markets of data centers, energy and sustainable infrastructure markets. With around 62,000 employees and a sales volume of EUR 38.2 billion in 2025, HOCHTIEF is the leading construction management and green building company in the U.S. (through Turner), the largest contractor in the Australian infrastructure services market (CIMIC), a key player in U.S. transportation infrastructure (FlatironDragados) and a renowned civil engineering and building construction company in Europe. The Group's PPP and infrastructure development activity is complemented by its 20% stake in the leading international toll road concessions operator Abertis. HOCHTIEF's strong competitive position is underpinned by the Group's engineering know-how, innovative digital systems and supply chain & logistics solutions. Thanks to its long-standing commitment to sustainability, HOCHTIEF, where green projects account for almost 50% of Group sales, has been listed in the Dow Jones Sustainability Indices since 2006 and is committed to delivering on its ESG agenda including a net-zero target for 2045.
